   No. 306, 4th Floor, Sai Apex, Viman Nagar, Pune - 411014 (India)
   Telephone No.: 20-41322042, 41322043 Fax: 20-41322042, 41322043
MDAE Reports in 2019

NCC-MvPI is moving towards a point of sky-high with the efforts of all, who participated in the Materiovigilance Programme of India. NCC-MvPI appreciates the keen interest of participants and looking forward to work for the safety of patients by reporting the adverse events associated with medical devices.
Reference Manual for Medical Devices 2020

NCC-MvPI, Ministry of Health & Family Welfare, Government of India is prepared and published the “Reference manual for Medical Devices-2020” for the stakeholders. The interested stakeholder can get a copy at the cost of Rs. 4000/-. 
Intrauterine Contraceptive Devices (IUCD)

IPC-NCC for Materiovigilance program of India, evaluates each reported medical device adverse event to arrive a meaningful conclusion. In this connection, during the year 2019, certain number of events involving genital haemorrhage and other adverse events associated with the use of Intrauterine Contraceptive Devices (IUCD) of the same batch were reported. The same were recommended to CDSCO for the necessary action.

Healthcare professionals are sensitized to carefully monitor the above-mentioned alerts. Any event related to these medical devices is to be reported to NCC-MvPI
As we all know, the surveillance of medical devices is not as perfect as the drugs being administered to patients. The materiovigilance program since its launch in our hospital 2018 has slowly but steadily grown in strength and started tracking of adverse events in medical equipments and thereby preventing its recurrence in future. Accountability has always made people more responsible and MvPI ensures accountability right from the manufacturer to the care provider.

It is with great pride that we at royal care hospital are part of the MvPI. The initiative has ensured that all equipments are standard and function appropriately hence making sure that the patients get the best of quality and care from the treating institution. MvPI has also helped in improving the awareness within the biomedical engineers and also other technical people who are involved in care of patients.

Every institution in the future should be a part of the MvPI in the future thereby making sure that all the patients are given the right diagnosis, correct treatment and reducing undesirable problems to the patient.

- Reports are received and collected from different departments and wards such that Paediatric, Gynaecology and Radio diagnosis of AIIMS, Patna.
- Sensitization and awareness on MvPI and MDAE reporting is on progress around the hospital. We have sensitised the nursing staff from different department about how to report, what to report, where to report and describe the nursing staff, how to fill the MDAE reporting form.
- Created awareness among the healthcare professional about Materiovigilance. Any medical device adverse event in the hospital premises can be reported through mobile no. 8544423488 which is dedicated for MDMC 24x7.
- MDMC AIIMS-PATNA willing to organise 1 day workshop on materiovigilance to create awareness about safety of medical device.

As per the guidelines of MVPI, materiovigilance expert committee is formed and the first meeting was held on 7.11.2019. The importance and the need of medical device adverse events reporting was emphasized. Various suggestion from the members were discussed and analyzed in the 2nd meeting held on 11.12.2019 to establish the MVPI and reap the benefits. It is hoped to gear up soon in our hospital.
